

CEVA in Middle East introduces **City of Energy**

A fully dedicated hub for warehousing, cross-docking, flow management and handling of products destined for the Energy sector in the Middle East.

The launched City of Energy, strategically located in Jebel Ali Free Zone, Dubai, United Arab Emirates (UAE), is a multi-customer logistical hub dedicated solely to energy, oil and gas companies offering industry specific solutions to meet your supply chain requirements.

The hub covers an area of 72,000 sq m, offering ambient and temperature control storage and a dedicated area for Dangerous Goods Regulation (DGR) products. It also fully meets or exceeds the requirements for Health, Safety and Environment in the UAE. The operations are run by a highly skilled team with extensive experience in the energy industry.

Control Tower

The City of Energy hosts CEVA's Control Tower, an innovative and integrated information hub that offers enhanced control functions that caters to all logistics services. Structured in a similar way to other Control Towers that CEVA operates around the world, the Control Tower helps manage the flow of materials locally, regionally and globally through:

- Full and comprehensive overview of logistics activities and improvement of supply chain efficiency
- Optimized transport planning solutions
- System of advanced reporting of processes in real-time
- Supply chain optimization

www.cevalogistics.com

Key benefits:

- ✓ A dedicated and specialized team
- ✓ In-house Control Tower
- ✓ Freight management and Contract Logistics integration
